

# The 'Business of Good' Experience

The Business of Good Experience helps participants understand the hidden drivers of consumers, the impacts of their decision making and have greater understanding of the unnecessary waste of goods in Australia.

The workshop sees small teams competing against each other to create the most profitable small business. We use elements of economics, corporate responsibility, consumer preference and inventory management to create powerful team learning outcomes.

Participants will experience:

- Detailed role play scenario
- Deeper understanding of Good360
- Human centred debrief session

If you want to develop your team while improving their skills and having a social impact, this is the program for you!

## Group size

Perfect for 8-12 people

## Location

Dulwich Hill, Sydney
